

# AUTOMATED TEXTILE INSPECTION

## CHALLENGES

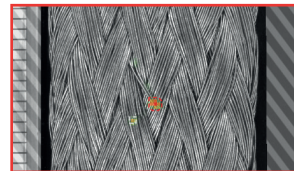

- ▶ Total control (100%) over production.
- ▶ Evaluation criteria must be consistent.
- ▶ Ability to guarantee product traceability.
- ▶ Changes to production must be implemented swiftly.
- ▶ Must be configurable and workable for all users.

## ADVANTAGES

- ▶ The consistency of the evaluation criteria can be controlled.
- ▶ The life cycle is shortened.
- ▶ The traceability of your products is guaranteed.
- ▶ Our system is “self-learning” and quickly
- ▶ Configurable and workable for any user.

## RESULTS

- ▶ Production quality is guaranteed.
- ▶ Several inspection lines use the same evaluation criteria.

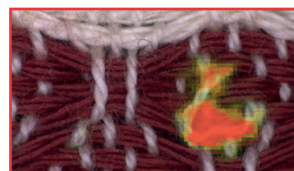

*Technical fiber inspection*

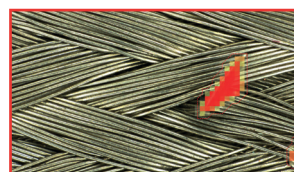

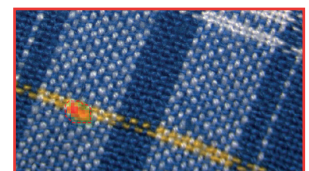

*Specific inspection*

*Paper inspection*

*Textiles inspection*

*Ropes and cables inspection*

## CPAUTOMATION PRODUCT

- ▶ Our engineers are on hand to advise you and assist you to integrate our viewing system regardless of the machine or production line.

### GENERAL SPECIFICATIONS

Inspection system	CP-View S
Speed	> 1m / s
Detection accuracy	> 0.1 mm
